Work History

Software Engineer
June 2022 - Present
Costrategix, Bengaluru, India

Projects

Prolink staffing: US Healthcare Vendor Management System. Multi Tenant Application which uses complex front end logic

- Key member for implementing user authentication from SSO login.
- Developed customized data grid, which allows user to save views by table reordering, sorting, advanced filtering and column visibility management.
- Created customized dashboard layout with saved view for user to add / remove charts.
- Developed reusable components that significantly reduced development effort on project.
- Actively engaged in developing complex user interface using React js and Redux tool kit for state management.
- Participated in code reviews, debugging and troubleshooting to maintain code quality and reliability

Practice Resource Network (PRN): Provider of revenue cycle management and consulting services to physicians and hospital clinics

- Integrated new technologies into existing systems, increasing capabilities and improving overall performance.
- Developed scalable and maintainable code, ensuring long-term stability of the software using react query for state management.
- Refactored legacy code bases for improved maintainability, paving way for easier future updates.
- Worked on the production phase of the project where work is to debug the code and fix the given problem.

Trainee Software Intern
Nov 2021 - May 2022
Design Test Code (DCT), Bengaluru, India

Open Table Clone: Created a user-friendly interface for users to browse restaurants, select dates and times, and make reservations. In addition to User Authentication.

- Set up and managed the database architecture to efficiently store and retrieve restaurant information, user data, reservations, and reviews.
- Review System: Implemented a feature that enables users to submit and read reviews for restaurants, enhancing user engagement.

OTHER EXPERIENCE

AR- Executive in medical coding
Aug 2019 - Oct 2021

- Omega HealthCare, Bengaluru, India

- I have 2 years of experience where I initially worked as a Medical Coder and Accounts Receivable, gaining a strong foundation in healthcare processes, billing cycles, and data analysis.
- This role has strengthened my skills in problem-solving, data-driven decision-making, and agile methodologies, while enhancing to collaborate effectively as a team player in cross-functional environments.
- I managed complex medical coding tasks, This role honed my attention to detail, analytical skills, and ability to work within a structured, deadline-driven environment.
